OBJECTIVE

An independent and self-motivated Computer Application graduate looking for an entry-level position where I can utilize the extensive knowledge and skills I have gained during my courses. Seeking to become an expert as a WEB/Software developer.

EDUCATION

Bachelors of Commerce in Computer Applications, Computer Application	Apr 2019 – May 2022
Dr. Ambedkar Institute of Research and Management Studies	8.2/10 CGPA
12th CBSE	2018 – 2019
UDAY PUBLIC SCHOOL	6.2/10 CGPA
10th CBSE	2016 – 2017
UDAY PUBLIC SCHOOL	8.2/10 CGPA

PROJECTS

My Portfolio

A responsive personal portfolio that highlights professional achievements and showcases a carefully curated selection of projects.

React CRUD App

Developed a functional and visually appealing CRUD (Create, Read, Update, Delete) application using React and front-end technologies. The application provided a simple and effective way for users to manage and manipulate data in a database, and demonstrated proficiency in using front-end technologies to enhance the user interface.

Forkify

Created a recipe search engine that considers user's dietary preferences and available ingredients. Skills Utilized: HTML, CSS, JavaScript, Pagination functionality.

Mapty

Created Mapty a web based application, that lets users to effortlessly log and track their fitness progress. As part of this project, I also created a local database to securely store user data and workout information.

Banking Homepage

I designed and developed a custom homepage for a bank using HTML, CSS, and JavaScript. The homepage showcases the bank's products, services, and features, and includes sections such as about us, products, services, and contact.
